1. authenication/verification/forgot pass/creating acc – email otp

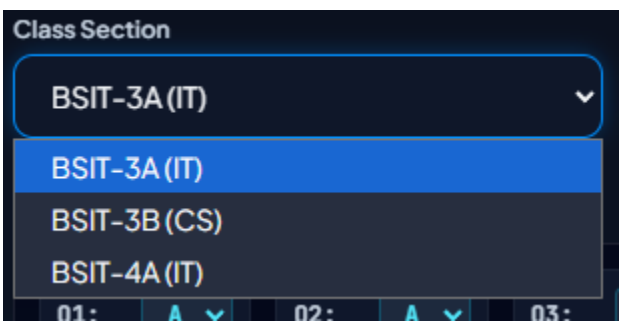

2. typing the password (see or unsee)

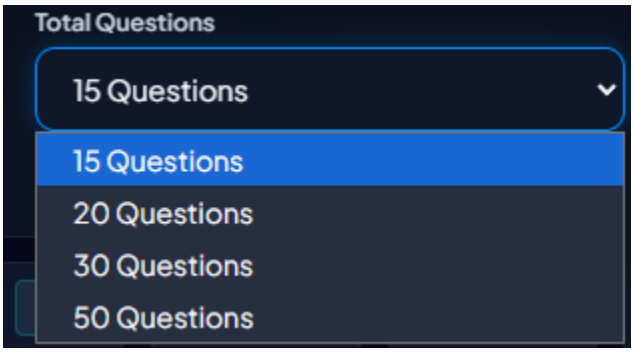

3. add AI Feature na makagawa ng Test Questions then automatic sya mag bigay answer keys

-sa pag AI ng Test questions, need nya muna mag upload ng file/pdf/ppt, pwede multiple files or lessons sabay na e upload then before mag generate ng test questionnaire need nya muna mag lagay ng course, subjects, year and section (yong NAME , DATE is parang naka default lang) After ma create ang Test questions sa bottom part may button na "Generate answer keys", then need lang e click to generate ..yong generated na answer key is ma direct sya sa answer key interface then pwede nya ma edit yung mga key if may mga mali tapos doon na din sya mag title ng assessment, subject code at kung anong course, year and sections.

4. ANSWER KEYS – After ma save ang new assessment dapat pwede ma edit yung mga na save at sa pag delete naman,pag pindot ng delete button dapat mag warning muna para ma confirm talaga kung e delete ba talaga. Ex. “Are you sure you want to delete?”

- create new assessment-- (sa class section option dapat makita yung mga iba pang sections or pwede ma edit, at sa Total questions padagdag na din 80 questions at 100 questions)

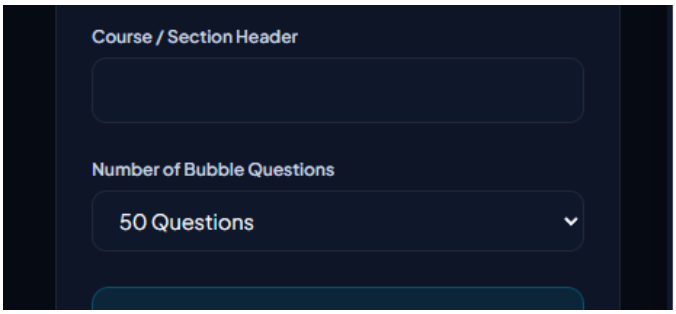

- Sa pag create ng answer keys dapat di na kailangan e select para mag labas yung mga options.. dapat naka display na yung mga letters tas kailangan nalang pindutin para mas madali. Then padagdag nalang din ng option “E”

Ex.

5. SCANTRON PDF (ma update yung pag edit ng course/sections header sa live sheet paper layout preview then padagdag din 80 questions at 100 questions

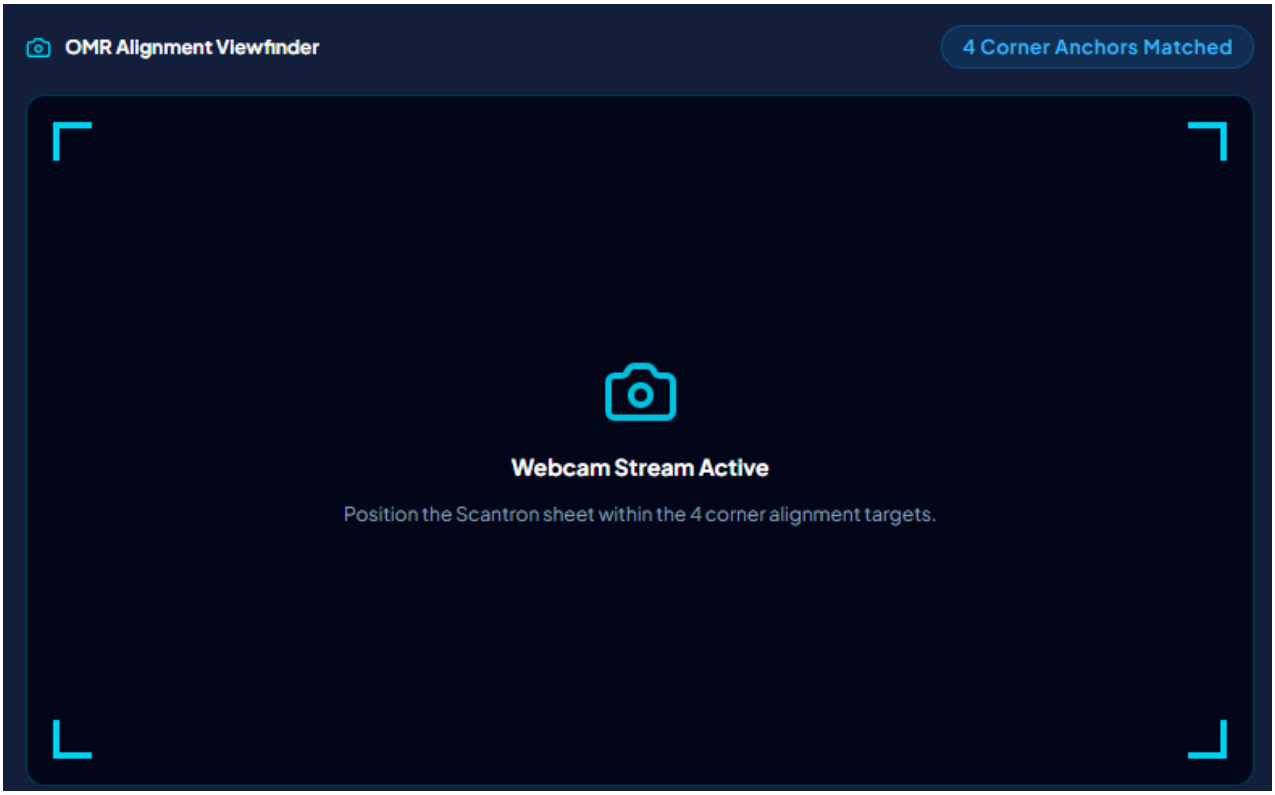

- suggest layout…..if pwede
